# GLOBAL REACH

ROUTES, PERFECTED.

GLOBAL CONNECTIVITY | MANAGED SERVICE | DIGITAL INFRASTRUCTURE MANAGEMENT

# WE DON'T JUST BUILD ROUTES. → WE OPTIMIZE THEM.

In a world of complex digital demands, you don't need a provider who just owns the cable. You need a **partner** who understands the traffic.

As a Global Virtual Network Operator (VNO), IX Telecom sits above the physical infrastructure layer, giving you the agility to route around outages, latency, and geopolitical barriers.

## THE IX DIFFERENCE

### CARRIER NEUTRALITY

We aggregate the best networks in every region, giving you a single, optimized solution.

### RAPID DEPLOYMENT

We aggregate the best networks in every region, giving you a single, optimized solution.

### THE ASEAN EDGE

With headquarters in Malaysia and offices across the region, we navigate the complex "Last Mile" of Southeast Asia so you don't have to.

## END-TO-END NETWORK SOLUTIONS

### GLOBAL CONNECTIVITY

**IPVPN & Private Leased Lines (IEPL/IPLC)**  
Secure, low-latency connections for enterprise data.

**Dedicated Internet Access (DIA)**  
Guaranteed bandwidth for mission-critical operations.

**5G & LTE Enterprise**  
Rapid wireless deployment for remote sites or backup.

### MANAGED INFRASTRUCTURE

**Managed SD-WAN**  
Intelligent traffic steering for the modern enterprise.

**Dark Fiber & DWDM**  
Ultra-high capacity for data centers and hyperscalers.

**Cloud Connect**  
Direct on-ramps to major cloud providers.

### ENGINEERING SERVICES

**Remote Hands (Smart Hands)**  
On-site technical support in 200+ countries.

**Equipment Management**  
Procurement, installation, and maintenance.
